**Subject:** inject change

Well, I wish I'd had the declared counties list prior to developing the injects. Apparently the TN Pipeline spill is in a non-declared county.

Whoops.

So I moved it. New inject:

NRC REPORT FROM COLONIAL PIPELINE. BREAK OF 40-INCH CAPSTONE PIPELINE AT **HATCHIE RIVER CROSSING IN HAYWOOD COUNTY**. Liquefaction expected as the cause 35.532370, -89.441768. Estimated 50,000 gallons crude on the ground. Pipeline still leaking. Colonial has OSRO engaged.

A little further north. Shouldn't affect game play.
